

CHALLENGE OF DEVELOPING RISK AND GOVERNANCE FRAMEWORKS WITH SIMR'S - THE REGULATOR EXPERIENCES

Solvency II has led to the development of new risk and governance frameworks for UK insurers. The regulatory landscape can be more challenging than first thought or even encountered. Getting the requirements right involves liaising and interacting with the Regulator.

Wouldn't it be good to understand the Regulators insights and experiences. Join us to hear Nick Dexter, member of the PRA Senior Advisory team, share the PRA's insights and experiences.

Nick's principal area of expertise is in insurance and he advises supervision teams on technical areas such as Solvency II, and insurance practice more generally. He assists both banking and insurance supervision teams on management and governance reviews, and sits on their PSM, SIMF and IMAP panels.

Nick is a member of the UK actuarial profession's Life Board and International Board. He is also vice-chairman elect of the IAA's Regulation Committee.

Date

Thursday
6th December
2018, 10am - 12pm

The Dome Room,
1 Cornhill, London,
EC3V 3ND

Guest Speaker

Nick Dexter
